

Rubric:

Criteria	3	2	1
Thoroughness	Works for many types of accounts, and is implemented. Works for ownership of content	Partially implemented, supports some accounts and content types.	Little or no implementation, works for only a few accounts.
Robustness	Tolerates different errors or input methods. Considers fallbacks, failcases	Accurate but less flexible. Does not consider fallbacks	Inflexible and idiosyncratic methods used
Originality	If using existing work, describes tradeoffs, and suggests improvements. Or presents new solution	Solution has some novelty, or existing work is expanded upon somewhat	Uses existing work with no further elaboration
Decentralization	Design supports user agency, resilience. Does not have a central point of failure.	Design has points of centralization that makes sense	Design is entirely centralized in inflexible way

Template for submission:

- Title
- Name (Include your real name, and a secret pseudonym below)
- Pseudonym
- Would you like your real name published if you win? (Y/N)
- Associated Url(s)
- Explanation & Instructions (<750 words)
